Description

Electric City is an easy airport for plane camping with a long, paved runway. It's located far from town and on the lake making for a quiet camping setting.

Camping is available on the west side of the runway. A small pilot's lounge is available on the ramp too.

The lake shore is quite rocky, but getting into the water is still possible from the camping area for those with inflatable kayaks or SUPs.

Transient Parking

Transient parking is available on the ramp or if camping the grass camping area is smooth and large enough to taxi onto and park there.

If you don't want to taxi down the grassy slope to the camping area you can park on the paved tiedowns on the east side of the runway and use the provided carts to haul your camping gear to the camping area.

Crew Car Availability

A crew car is available near the pilot's lounge for trips into town.
