Description

A *high density altitude* airport, this is the best airport for your visit to Lake Tahoe. There's lots to do, between the mountains, boating, and golfing.

The airport has a [noise abatement procedure](#) that keeps you clear of the higher population densities and higher terrain.

Unfortunately, the Flight Deck Sports Bar & Grill which was located on the field has closed permanently. There is food within a short walk from the airport, but nothing directly on the field.
