Description

Welcome to the lowest airport in the USA! In addition to the fun you'll have landing here, the airport provides convenient access to the nearby campgrounds (reservations available, and probably suggested, through [recreation.gov](https://www.recreation.gov)).

The nearby resort also offers restaurants, golf, and indoor accommodations if you're not terribly interested in pitching a tent. There are also jeep rentals if you want to get out and explore Death Valley National Park.

The runway is in rougher shape, so plan accordingly. The National Park Service suggests you treat it like a gravel runway.

The [nearby National Park visitor's center](#) has details on the area and other activities within the park.
